

How to Get Free Spins in Coin Master Fast (Latest Method)

27 September, 2026

Building up a healthy balance of coins and spins in **Coin Master** is key to upgrading your villages, moving up levels, and protecting your turf from raids. Because building costs scale up significantly with each new village, relying purely on hourly spin regeneration can slow down your progress.

Official Daily Reward Links

Moon Active, the developer of Coin Master, releases free spin and coin links daily across their official social media channels.

- **Where to find them:** Check Coin Master's official Facebook, X (formerly Twitter), and Instagram accounts.
- **How to claim:** Tap the link on the mobile device where Coin Master is installed. The game opens automatically and credits the reward directly to your account.
- **Expiration:** Most link rewards expire within 3 to 4 days, so redeem them promptly.

In-Game Strategies for Earning Extra Coins

1. Maximize Your Raids

- **Save Big Spins for Raids:** Use higher bet multipliers (2x, 5x, 10x+) when you are close to hitting the raid symbols. Raiding the current "Coin Master" yields significantly higher rewards than standard attacks.
- **Dig Wisely:** During raids, use the Foxy pet to dig up the fourth hole for extra loot.

2. Leverage Active Events and Tournaments

- **Event Rewards:** Events like *Attack Master*, *Raid Master*, or *Village Master* offer massive milestones of free spins and coins for reaching specific targets.
- **Tournament Tiering:** Participating in daily tournaments awards bonus coins based on your leaderboard ranking.

3. Card Sets & Pet Management

- **Complete Card Collections:** Finishing a card set awards thousands of free spins and millions of coins. Focus on trading duplicate cards with friends or in official trading groups to complete sets faster.
- **Feed the Right Pets:**
 - **Foxy:** Best for extra coins during Raids.
 - **Tiger:** Extra coins during Attacks.
 - **Rhino:** Shields your village from enemy attacks to prevent losing saved coins.

4. Social & Team Perks

- **Join a Team:** Being part of an active team allows you to request free spins and coins from teammates every few hours.
- **Connect to Facebook:** Linking your Facebook account awards a one-time bonus of spins and coins, plus additional rewards when inviting friends who join the game.
- **Daily Gifts:** Send and receive daily free gifts with Facebook friends without depleting your own balance.

Safety and Security Warning

Beware of Coin Generators: Never enter your login details, phone number, or personal information on third-party websites claiming to offer "unlimited coin generators" or "hacks." These are scams designed to compromise your account or compromise personal data. Stick strictly to official Moon Active links and standard in-game mechanics.

Pets in **Coin Master** provide powerful active and passive bonuses that significantly boost your coin earnings and help protect your

village. Knowing how each pet functions—and managing your food supply effectively—is essential to making fast progress.

The 3 Pets & Their Core Bonuses

Pet	Unlock Requirement	Ability & Bonus Type	Best Used For
Foxy	Reaching Village Level 4	Extra Raid Coins: Digs the 4th hole during Raids and awards a percentage bonus on total raid payout. Starts at +16% extra coins and reaches +100% (doubles payout) at Level 100.	Active raiding sessions, Raid Madness events, or high spin bet multipliers.
Tiger	Completing the Beasts Card Set	Extra Attack Coins: Multiplies coins earned every time you attack another player's village. Starts at +60% extra coins and scales past 300%+ at high levels.	Active spinning sessions during Attack Madness or Ultra Attack events.
Rhino	Completing the Creatures Card Set	Village Defense: Gives a percentage chance to block incoming enemy attacks, saving your buildings even if you run out of shields. Starts at a 10% block chance and scales up to 70% .	Passive defense while offline or when saving up coins to complete a costly village.

How Pet Food & Timers Work

- **Activation Duration:** Feeding a pet 1 Pet Snack wakes it up for **4 hours of real-time**. The timer runs continuously in real-time, meaning it will not pause if you close the game.
- **Daily Free Snack:** The game awards 1 free Pet Snack every 24 hours (lasts 15 minutes or 4 hours depending on active promos).
- **Single Pet vs. Pet Crew:**
 - *Early Game:* You can only activate **one pet at a time**. Switching active pets puts the previous one back to sleep.
 - *Pet Crew (Higher Villages):* Unlocks at **Village 140–200+**, allowing you to feed and run **all 3 pets simultaneously** for combined raid, attack, and defensive bonuses.

How to Level Up & Upgrade Pets

1. **Pet XP Potions:** Earned from opening chests, completing card sets, participating in event milestones, or spinning. Apply XP potions to individual pets in the Pet menu to permanently boost their skill percentage.
2. **Priority Upgrades:** Most players prioritize leveling **Foxy** to Level 100 first to double all Raid payouts, then shift focus to **Tiger** for attack events.
3. **Pet Outfits (Late Game):** Equipping outfits (unlocked via village progression and events) provides extra flat percentage boosts to a pet's base stats.

Food Management Strategy

- **Align Feeding with Play Sessions:** Only feed Foxy or Tiger right before you start an active 15–30 minute spinning session. Never feed them right before closing the app.
- **Save Rhino for Offline Mode:** Feed Rhino right before putting the game down for the night, especially if you have incomplete village buildings exposed to attacks.
- **Stockpile for Events:** Save extra Pet Snacks earned from chests or events for high-multiplier events like *Raid Madness* or *Coin Craze* to maximize return on investment.
